

21st Century Biofuels

Merging farmers, restaurant owners and consumers to support and sustain Oregon economy and people

With the high cost of fuel and its adverse effects on the environment, people everywhere are searching for new options...

21st Century Biofuel provides those options

With our dependence on foreign oil and all the problems it has caused there is strong desire to seek alternative fuel sources...

21st Century Biofuel has those alternatives

With our strong desire to create and support our local economy and community...

21st Century Biofuel has emerged!

Our goal at 21st Century Biofuel is to merge farmers, restaurant owners and consumers to support and sustain Oregon economy and people.

How do we plan on doing this? By creating a team of "energy partners" who use biofuel, or vegetable oil, to benefit each other, the community at large, and the world!

Please read on to **see how YOU can be one of the PIONEERS to help create a sustainable and thriving economy, environment and community!**

What is the focus of 21st Century Biofuel?

Our goal is to acquire waste stream from local restaurants and supply it to local, organic farmers who will use the biofuel to run their farm machinery and produce healthier food for Oregon residents and contribute to the environment in a positive way.

What are the overall BENEFITS of using Biofuel?

- 1) Biofuel is **CHEAPER** than diesel. With the increasing cost of diesel who can afford NOT to look at alternative fuel sources?
- 2) Biofuel (vegetable oil) is **environmentally friendly**. It reduces the Greenhouse effect because plant based fuels do not cause a net increase in Carbon Dioxide.
- 3) Biofuel **decreases our dependency on foreign oil** and creates a strong American economy.
- 4) Biofuel **supports Mother Earth** in doing what she does naturally. Most of us are familiar with the "circle of life" where a seed uses the nutrients from the soil and develops into a plant. A bird then eats the plant and uses the energy from the seed to fly and reproduce. The excrement from the bird then re-fertilizes the soil and creates new seeds which develop into new plants. Nature created a perfect system, and now we want to get back to it!
- 5) Biofuel "energy partners" **create local jobs** and support our community.

READ ON to find out how **YOU can benefit** from using biofuel...

How can YOU PERSONALLY benefit from using biofuel?

Restaurant Owners will benefit from being an "energy partner" by:

- having a **10% reduction of costs** in their waste stream removal
- having the waste stream stay in Oregon and **benefit local Organic farmers**
- cashing in on all the "**publicity**" of being a pioneer in the use of biofuel technology
- making sure that the small resource of oil gains the **maximum benefit by putting the oil in the hands of the people that need it the most--our local farmers!**
- **being part of the solution** for a better planet

Farmers will benefit from being an "energy partner" by:

- significantly **reducing the cost** of production. Biofuel is cheaper than diesel and will always be cheaper than diesel. You can expect to see a **20- 30% reduction in fuel costs** in the first year alone!
- **improving performance of machinery.** Biofuel increases the life and quality of your equipment.
- **creating healthier produce** for the consumer. The diesel fuel that runs your equipment leaves a residue of soot on the produce. Using vegetable oil

will decrease the amount of pollutants on produce.

- by **saving the environment!** Using plant based fuels decreases the Greenhouse Effect because there is NOT a net increase in Carbon Dioxide added to the atmosphere.

Consumers will benefit by:

- Eating healthier food and living longer
- Saving money because there will be a reduction in the cost of food production
- using a resource that will free us from our dependency on foreign oil
- reducing the amount of pollution it takes to bring food to market, therefore decreasing the Greenhouse Effect

Here's what you GET by becoming an energy partner:

Farmers:

Besides all of the other benefits mentioned above like decreasing your production costs, improving your equipment performance, creating healthier produce, and supporting the environment here are more specifics of what you will get...

- 1) If you'd like to convert your machinery to use bio-fuel we have created a special design that allows you to introduce biofuel to your engine. We will gladly install this tool on your tractor for you!

- 2) You can purchase the biofuel by the bucket (5 gallons), barrel (55 gallons) or tote (175 gallons or 300 gallons) at a significant savings.
- 3) We will deliver the fuel to you at the small price of \$10.00 per delivery.
- 4) We will provide you with an educational video that supports you in the special operating procedures for using biofuel.
- 5) You have our guarantee that all our biofuel is high quality (filtered to 5 microns).

Restaurant Owners:

Besides all of the benefits mentioned earlier like reducing your disposal costs and supporting the local economy, here is what you will get specifically...

- 1) We will come pick up your waste stream at **10% less** than what you are currently paying.
- 2) We'll provide you with a 55 gallon barrel and you just let us know when you want it picked up!
- 3) You get a window sticker that shows your support of biofuel and the environment.
- 4) You get a logo to use for promotional purposes. Put one on your menu so customers know that you support the local economy and environment.
- 5) You get your business name or logo displayed on the side of our delivery truck which will be used to deliver biofuel throughout the city.

- 6) You get a link to our website which will encourage consumers to support their local energy partners!
- 7) Plus we make it very easy for you because we accept Visa or Mastercard and have auto billing.

Our goal is to **support 100 farmers and fisherman** with all their fuel needs each year. In order to do this we need 1,000 gallons of oil per day. So you can see the importance of creating a **mutually supportive TEAM of farmers and restaurant owners.**

With peak petro chemical products looming, 21st Century Biofuel aims to ease the transition into new world practices by starting healthy habits now!

We are ushering a new stage in the evolution of our planet by beginning sustainable practices now.

Don't be left out. Join one of the elite PIONEERS who are making a difference globally AND locally!

Call us NOW to find out how **easy and simple** it is to get started. You'll feel great knowing what a difference you're making in Oregon and in the world!
